

Toxicity of power plant waste

(theoretical deaths per gigawatt hour of electricity generated)

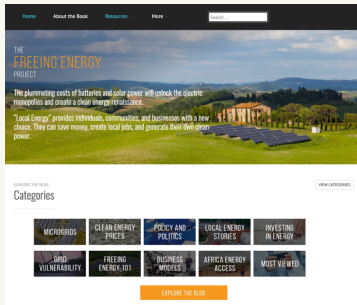

FREEING
ENERGY

These numbers are illustrative for comparison purposes only. Exposure to concentrated toxic substances is highly unlikely. | <http://fep.link/g111>

The Freeing Energy Project

- ⚡ The mission of the Freeing Energy Project is to educate and inspire energy fans towards accelerating the transition to clean, sustainable energy like solar, wind, and batteries.
- ⚡ The project has a deep focus on the consumerization of energy technology and its ability to enable affordable, reliable, self generation, or as we call it, local energy.
